MARGRES
CERAMIC TILES

“Living in a metropolitan context means interpreting diversity, experiencing innovation, being in constant movement, where evolution and change are the order of the day. Margres interprets the main features of urban style and contemporary architecture, assuming the concepts of freedom and irreverence that characterise them. Subway came about through this constant research, proposing a modern, avant-garde style, an innovative product with an irreverent design, which can fully assimilate the contemporary concept of urban living.

It is a functional product with the multipurpose features of a coloured paste ceramic tile, capable of meeting all of the demands of modern architecture.

Its large formats, neutral shades and smooth lines allow Subway to create surfaces that are discreetly distinguished, taking you into a typically urban atmosphere and giving an avant-garde style to the most varied of spaces.

Subway captivates through its modernity, adapting perfectly to the new trends of contemporary architecture.”

“Viver num contexto metropolitano significa interpretar a diversidade, viver a inovação, estar em continuo movimento, onde a evolução e a mudança estão na ordem do dia. A Margres interpreta os principais traços do estilo urbano e da arquitectura contemporânea, assumindo os conceitos de liberdade e irreverência que o caracterizam. Desta constante pesquisa nasce Subway, propondo um estilo moderno e de vanguarda, um produto inovador com um design irreverente, capaz de assimilar a 360 graus a concepção contemporânea do habitat urbano.

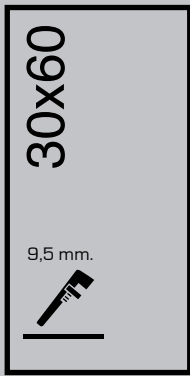

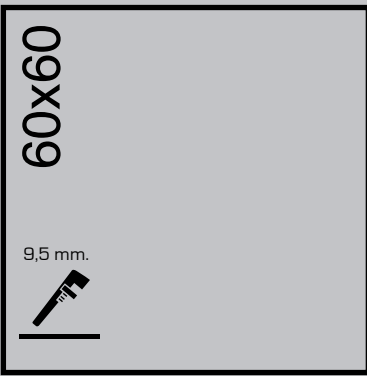

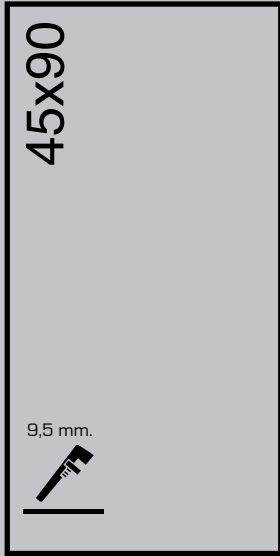

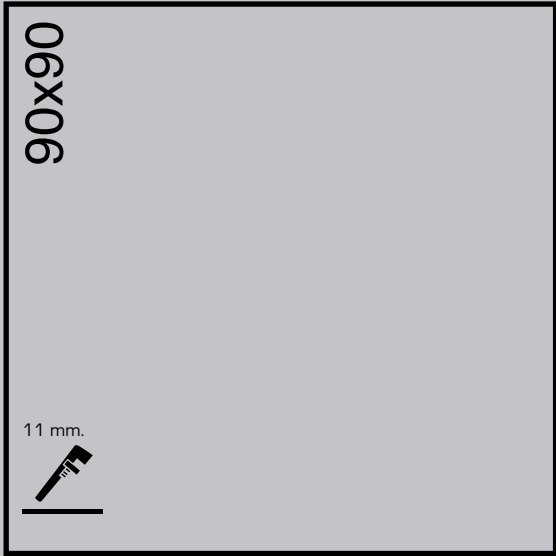

Um produto funcional, com a polivalência de um grés porcelânico de pasta corada, apto a satisfazer qualquer tipo de exigência da arquitectura moderna.

Com grandes formatos, tonalidades neutras e linhas suaves, Subway cria superfícies que se distinguem de forma discreta, remetendo-nos para uma atmosfera tipicamente urbana, conferindo um estilo vanguardista aos mais diversos espaços.

Subway cativa pela sua actualidade, adaptando-se na perfeição às novas tendências da arquitectura contemporânea.”
